

Álvaro Bachiller Hurtado

Support Lead at CARTO

Madrid, Spain alvrobh@gmail.com linkedin.com/in/abachiller alroba.github.io github.com/alroba

Profile

Geospatial engineer leading technical support at CARTO, the Agentic GIS platform. Background in forestry engineering and geodesy and cartography, plus computer engineering studies, with ten years working on spatial data infrastructures, web map services and cloud platforms. I use spatial data and AI agents to help people solve real problems.

Experience

2020 – present	CARTO	
	Support Lead	Jul 2024 – present
	Technical Account Manager	Feb – Jun 2024
	Senior Support Engineer	Aug 2022 – Jan 2024
	Support Engineer	Jan 2020 – Jul 2022
	Team coordination and development, technical support and assessment, self-hosted installations and maintenance, technical account and project management, GIS and data science proofs of concept, and training development and delivery.	
2016 – 2020	National Geographic Institute (IGN-CNIG)	
	Spanish Spatial Data Infrastructure (IDEE) team	
	Research and development of vector tile services, creation of WMS and WMTS services, implementation and review of INSPIRE services, and maintenance of the IDEE portal. Talks at the 8th and 9th Iberian Conferences on Spatial Data Infrastructures (Lisbon and Mahón) and at the 13th Conference of the International Cartographic Association in Madrid.	
2015	Zumain Ingenieros	
	Engineering intern	
	Drone photogrammetry flights and orthophoto processing to build digital terrain models. Survey of 43 hectares with robotic total station and GPS for the City of Madrid's green spaces inventory.	
2015	Technical University of Madrid (UPM)	
	Research assistant	
	Programming and ontologies for the “España Virtual” research project.	
2013 – 2015	Earlier field and teaching work	
	Helicopter-borne wildfire brigade (FCC Environmental, 2013), tree and botanical inventory mapping (Jesgar Jardinería, 2014) and tutoring students with learning difficulties (Piensa Piensa, 2015).	

Education

Computer Engineering studies (not completed)
UNED 2020
Master's in Geodesy and Cartography Engineering
UPM 2015
Forestry Engineering
UPM 2012
Erasmus exchange, Forestry Engineering
Czech University of Life Sciences Prague 2011

Skills

Leading support
Team coordination and development, technical support, technical account and project management, training design and delivery.
AI agents
Programming with AI agents such as Claude, ChatGPT and Gemini to automate user use cases with CLIs and internal support processes.
Geospatial
Spatial databases and PostGIS, GIS, vector tiles, WMS and WMTS, INSPIRE and spatial data infrastructures, surveying and photogrammetry.
Platform & code
Cloud computing, Kubernetes, self-hosted deployments, Linux administration, Python.

Certifications

- Manager Essentials, Insight Partners (2024)
- Essentials of Linux System Administration (LFS201), Linux Foundation
- Spatial Databases: PostGIS 2
- Web mapping application development, MappingGIS

Languages

Spanish (native) and English (C1).
